

Information Resources

Created for FOIA EPA-HQ-2019-003303

February 20, 2019

The information requested is publicly available through EPA's ChemView (<https://chemview.epa.gov/chemview>) platform.

- A. The first document (TSCA 8(e) Substantial Risk Notice on N-ethyl perfluorooctyl sulfonamido ethanol and perfluorooctane sulfonate, September 14th, 1998) referred to is 8EHQ-98-394A.

Select "Advanced (search) tab" (near the top) under *Chemical Information*

Select "Exact" tab under *Document Information*

Enter "8ehq-98-394A", press enter

Scroll down to Show Output Selection

Select "Data submitted to EPA" triangle icon to get drop down menu

Select "Substantial Risk Reports"

Select green button "Generate Results"

On right side of page, select the chemical

Select "reproductive toxicity" under *human health*

Select "study" under study type

Select "View Substantial Risk Report" at the top right of page to open the PDF.

- B. Regarding monkey toxicity data for PFOA and PFOS, there are 5 studies under PFOS (CAS 1763-23-1 (Suggested web browser: Google Chrome)

Select the "Advanced (search)" tab

Select "Starts with" tab under *Chemical Information*

Start to enter CASRN (1763-23-1) and enter

Under *Document Information*, select "Starts with" tab, start entering "8ehq-80-37" and press Enter

Selection in *Document Information* should read "starts with: 8EHQ-80-37" not "8EHQ-80-373"

Scroll down to *Show Output Selection*

Select Data Submitted to EPA triangle icon for drop down

Select "Substantial Risk Reports"

Select green button "Generate Results"

Select the chemical in the results on the right side of page

Under *human health*, select "Repeated Dose Toxicity"

You will see a table where five studies have monkey listed as the species.

- C. No studies with your guidelines for PFOA were found.
